New Space-Efficient Strength Training Equipment

LAKE MILLS, Wis. —Vision Fitness, a fitness equipment company based in Lake Mills, WI, has released a new 700 Series line of selectorized strength training equipment. Designed specifically to provide users with a total-body workout, these space-efficient strength training machines are adaptable to any commercial facility.

The 700 Series multi-station and dual function units feature fully adjustable chrome uprights for infinite exercise possibilities, dual-pivoting pulleys to provide users with exercise variance, 2" diameter round easy-adjust pull pin handles, instructional placards to define exercise operation and muscles worked, and comfortable contoured upholstered seats and pads.

Features you'll find on the new strength training equipment:

- Swiveling pulleys and comfortable co-molded handles
- Integrated hooks for organizing and securing accessories
- All machines use industry standard Loos & Co. cable
- Double-stitched Boltaflex® upholstery over 2-inch high-density foam
- Shielded weight stacks
- Heavy gauge steel frames and tubing
- Durable powder-coat finish on frames to prevent marring and scratching

Vision Fitness began as a division of Trek® Bicycle Company, one of the world's largest manufacturers of quality outdoor bicycles. In 1996, Vision Fitness was spun off by Trek's management team to better focus on the specialized fitness industry. Vision Fitness provides a wide variety of innovative cardio and strength equipment for the Commercial market. Information on products and reviews can be found on their website, www.visionfitness.com.
